and NSD File No. L-00-72.

Dear FCC:

As a taxpayer and private citizen, I'm finding myself in a defensive position against increasingly aggressive governmental taxation and 'nickle-dime' fee applications. I live in Washington state; here we're seeing citizens and taxpayers over-riding tax and fee based legislation through ground-swell movements. Individuals are rising from the anonymous public and creating anti-tax & fee political actions to resist the increasing 'creep' of governmental intrusion into our lives and pockets. If regulatory and beauracratc agencies don't pay attention to this public reactive posture, polictical life will become more ..challenging, producing a trickle-effect negatively impacting regulatory agencies. Please do us all a favor. Instead of applying offensive 'nicke-dime' charge-theory fees & taxes when the public isn't looking, try reducing expenses. If you do that and then tell us about it, we people might recover our confidence in government and be more cooperative in the futu!
re. Word to the wise.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,

robert davis
